

Trendy proposals for cocktail, shakes, aperitifs

B98

Nowadays, especially in the catering and entertainment sector, you have to search for innovative and eclectic solutions with a daring flare, capable of unleashing the bartender's imagination and capturing the public's attention.

In perfect keeping with these increasingly fanciful, intriguing and healthy needs, Ceado blenders have been created to achieve original, delicious results at any time.

Spotlights are on the B98 model, which plays the leading role amongst professional blenders, designed for unforgettable shakes and frozen cocktails.

RESISTANT

Made entirely in metal: from the motor body to the cutter assembly. This feature balances the parts and considerably reduces vibration while working, lending greater resistance and longer life to the machine.

UNIQUE

The B98 stands out from competitors because the cutter assembly is also made entirely in stainless steel. The blades, with their substantial 2 mm thickness, have been designed to crush, chop and mince ice to perfection, with the aim of creating unmistakable frozen cocktails.

INDUSTRIOUS

10 ice cubes crushed in just a few seconds: this is the result, with B98. Just add a bit of rum or unleash your imagination and... les jeux sont fait!

LOW-NOISE

The presence of metal and rubber/metal between the male and female joints becomes a winning pair because it eliminates all working noise, at the same time increasing safety and reliability during operation.

ECONOMICAL

Nothing is left to chance. The solution of the female joint in rubber/metal also facilitates maintenance of the B98. In the event of wear, simply remove the rubber part and replace it with a new one, without the need for a technician and with substantial savings in operating costs.

SAFE

Ceado has never compromised on safety. The B98 is a concrete example of this, as are all the other blenders. Each model is equipped with the patented safety system that immediately stops the blender when the cover is taken off the container.
